Note #1, Excerpt from Cruzada, October 1970, S. Nathan

JUNCOSA DE LAS GARRIGUES - this issue must have had a different 'arrangement' as the majority of this issue was on the market and can still be bought for a reasonable price. BUT what about the IMPERF variety. No-one for example had ever seen the 1 peseta value imperf .... some have claimed to have seen the other values .... but were these pairs? or were they 'cut down' perforated stamps. The remainder of the stocks of this issue were recently found. ALL IMPERF sheets stuck together like a stone. I imagine that the dealer had arranged for the printer to make him a limited quantity of these apart from the normal order. Galvez simply has a note....'exist imperf'. The last catalogue of the original 'dealer' responsible for the issue also lists them at 12pts the series while the prices were 3.35pts the series - about four times the price. In fact the rarity is much higher than this. Of the sheets found there were 49 sheets of the first four values and 7 sheets of the 1p. This seems that the original numbers were 50 sheets of 20 stamps of the first four values and 7 (or possibly 8) of the high value, making 1,000 stamps of 5c, 10c, 25c and 50c each and only 140 stamps of the 1p. No wonder Montseny never saw one and neither has any one else to my knowledge. I believe it has been decided to destroy most of the low values so that the majority are left as sets ..... but what a set! as rare as 'hens teeth'.
